EDUCATION

Charotar University of Science and Technology **Anand, Gujarat**
B.Tech in Computer Engineering (CGPA: 6.96) Nov 2023- May 2026

- **Coursework:** Data Structure & Algorithm, Data Communication & Networking, Database Management System, Software Engineering, Programming in Python, Operating System, Machine Learning, Advanced Web Technology, Cryptography & Network Security, Cloud Computing, Blockchain and Its Applications

Tapi Diploma Engineering College **Surat, Gujarat**
Diploma in Computer Engineering **(**CGPA: 8.35**)** Jun 2021- Aug 2023

- **Coursework:** Programming in C, Programming in C++, Java Programming, Operating System, Static Webpage Development, Dynamic Webpage Development, Database Management System, Computer Network, Advanced Web Technology, Android

SKILLS

- **Programming Languages & Databases:** C, C++, Java, JavaScript, PHP, Python, JSON, MySQL, MongoDB.
- **Technical Skills**: Networking, Operating Systems, Log Analysis, Encryption, IT
- **Web Technology & Framework:** HTML, CSS, Bootstrap 5, WordPress, Express.js
- **Software Development Tools:** Eclipse, Visual Studio Code, Cursor, Antigravity, Trae
- **Testing & Version Control:** Git, GitHub
- **Other:** MS Office tools such as Word, PowerPoint, Excel, Canva
- **Languages:** Gujarati, Hindi, English

WORK EXPERIENCE

Skyline Infosys **Surat, Gujarat**
Web Developer May 2024 - June 2024

- Developed a fully responsive chat interface with HTML, CSS, and JavaScript, enabling real-time messaging and seamless user interactions.
- Enhanced UI interactivity with client-side validation and dynamic DOM manipulation, optimizing frontend performance and load times.
- Conducted cross-browser testing and debugging to ensure consistent, reliable, and high-quality chat functionality.

Infotact Solutions **Bengaluru, Karnataka**
Python Development April 2025 - June 2025

- Developed Python automation tools, including a file organizer with scheduling and web scraping solutions using BeautifulSoup and Requests.
- Built and deployed a Flask To-Do web app with full CRUD functionality and SQLite integration.
- Managed deployments on Render and Heroku, and maintained version control with Git/GitHub for collaborative development.

White Orange Software **Surat, Gujarat**
Backend Development Jan 2026 – On Going

- Developing backend systems using Node.js, Express.js, and Sequelize ORM, integrating with MongoDB and MySQL for efficient data management.
- Built a Flipkart-like API implementing RESTful endpoints, CRUD operations, and user authentication for e-commerce functionality.
- Skilled in optimizing server-side performance, handling database queries, and managing project version control with Git/GitHub.

PROJECTS

Flipkart-like API

- Developed a Flipkart-like API using Node.js, Express.js, and Sequelize ORM with
- MySQL for e-commerce functionality.
- Implemented RESTful endpoints, CRUD operations, and user authentication for secure and dynamic backend services.
- Optimized server-side performance, managed database interactions, and maintained version control using Git/GitHub.

Automation Script – File Organizer

- Developed a Python-based automation script to categorize and move files into structured directories based on file type, reducing manual sorting efforts.
- Implemented scheduling with schedule and cron for automated periodic file organization, improving workflow efficiency.
- Integrated error-handling and logging mechanisms to ensure reliable file operations and maintain clean directory structures.

Mini Web Application – Flask To-Do App

- Developed a Flask-based To-Do web application with full CRUD operations, enabling seamless task creation, updates, and deletion through a user-friendly interface.
- Integrated SQLite as a lightweight database to ensure efficient data storage, retrieval, and task management with persistent data handling.
- Deployed and configured the web app on Render/Heroku, ensuring smooth performance, scalability, and reliable online accessibility.

IT Tuition Management System (https://it-tution-management.onrender.com)

- Developed a full-stack Tuition Management System using Node.js, Express, MongoDB, and JavaScript Registration, attendance tracking, and fee management.
- Implemented secure authentication with Encrypting Data for admins, teachers, and students, enhancing data security and user control.
- Configured automatic deployment via GitHub integration with Render, enabling continuous delivery and version control.

Simple Chat App (https://laxchatapp.onrender.com)

- Developed a responsive chat interface using HTML and CSS, ensuring a clean and user-friendly layout.
- Implemented real-time messaging functionality with JavaScript, allowing users to send and receive messages instantly.
- Managed user input, message display, and dynamic content updates using client-side scripting for smooth interaction.
